Pseudocodes for Lab-12

(1)
```
int. Print numbers
  {
    n = 0
    while [n <= 10]
    {
      Print 'n'
      n = n+1
    }
  }
```

(2)
```
int. Print even numbers
  {
    for [i=0 to 50, i++]
    {
      If ((i%2) = 0)
      {
        Print i
      }
    }
  }
```

(3)
```
int. Print multiplication table (int. numbes)
  {
    number = (input from user)
    n = 1
    until [n > 15]
    {
      print (n * numbes)
      n = n+1
    }
  }
```

(9)
```
int [], int []  read file (nums.txt) print int []
{
    numbers [] = read nums.txt
    Print numbers [*]
    l = get length (number [])
for  i = 0  to  l-1
  {
    print (number [i]*2)
  }
}
```

(5)
```
function divide (int num1, int num2)
{
    local quotient
    local remainder

if (num 2 ==0)
  {
   Print " Error : Division by zero is not allowed"
  }
else
  {
    quotient = num 1 / num 2
    remainder = num 1 % num 2
    Print "quotient" upto 2 decimal places'
    print "remainder"
  }
}
```

⑥
```
int. find maximum (int a, int b)
{
    maximum () = {
        If [a > b]
        {
        Print ['The maximum is' a]
        }
        else
        {
        Print ['The maximum is' b]
        }
    }
result = max ()
print result
}
```

⑦
```
int. check directory (<dirname>)
    {
    if (directory doesn't exist)
        {
        create directory
        print "Directory created"
        }
        else
        {
        Print "list all files in directory"
        }
    }
```

August - 18 (Daily Problems)

① function check file2 ()
{
file2
if (file2 exist)
{
Print "file2 exist"
}
elif (file2 is readable)
{
Print "readable"
}
elif (file2 is writable)
{
Print "writable"
}
else
print "file2 does not exists"
}

② int. Count words, lines & characters (file.txt)
{
If (file.txt exists)
{
words = Counts the words in file.txt
lines = counts the lines in file.txt.
Characters = counts the characters in file.txt
{
Print words
Prints lines
Prints characters
}
else
"file doesnot exist"
}

Aug 19 Daily Problems

① find word (String word, String filename)

```
{
  if (file exists)
  {
    search word in filename
    Print lines Containing word
  }
  else
  {
    Print "file does not exist"
  }
}
```

② int PrintMultiplication table (int. numbes)

```
{
  for (i= 1 to 20)
  {
    result = number * i
    Print number "*" i "=" result
  }
}
```

③ Check disk usage ()

```
{
  Usage = get current disk usage,
  Print "current disk usage :" Usage
    if (Usage > 80)
    {
      Print " warning : Usage is above 80%."
    }
}
```
